

Self Displaying Link Cell

TYPE	RATING		WEIGHT				
	(Tonne)	A	B	C	D	E	Grams
LL05SD	5	152	107	13	57	30	450
LL10SD	10	183	119	19	75	38	715

The Self Displaying Link Load Cell is designed for simplicity of use. Just fit and use. Each cell is manufactured from aircraft spec anodised aluminium alloy, fully tested and proof loaded.

The load cell is designed to be tied into the load path being monitored with a suitable lashing or using Harken Loups™. Switch ON to read the applied load or keep the ON key pressed to zero off any tare load on the load cell. The cell will automatically switch off after 2 minutes or can be switched off with the OFF key.

Load Cell specification

Proof load	150% of rated load
Max error band (linearity)	+/- 0.2% full range
Battery	1 x PP3 9V
Battery life	3 hrs continuous
Environmental protection	IP 65
